

MICKAËL GIRONDEAU

Web Architect & Blockchain Developer

Location: Versailles, Île-de-France, France

Email: mickael.girondeau@gmail.com | **Phone:** +33 6 26 33 68 10

GitHub: Mickael78000 | **LinkedIn:** mickaël-girondeau

PROFESSIONAL SUMMARY

Full-stack blockchain developer specializing in **multi-chain decentralized applications** spanning Ethereum, Solana, and Polkadot ecosystems. ENSAM engineering graduate with **over 15 years of combined technical leadership and software development experience**.

Expert in designing scalable, secure Web3 solutions with emphasis on smart contract security, system reliability, and cross-chain interoperability. Passionate about driving innovation in decentralized finance and building trusted multi-chain ecosystems.

TECHNICAL SKILLS

Blockchain Development

- **Ethereum:** Solidity, Hardhat, OpenZeppelin, Web3.js, Ethers.js
- **Solana:** Rust, Anchor framework, SPL tokens, TOKEN-2022 extensions
- **Polkadot:** Substrate framework, ink! smart contracts, parachain development
- **Cross-Chain:** Bridge protocols, multi-signature wallets, cross-chain messaging

Programming & Frameworks

- **Languages:** Rust, JavaScript/TypeScript, Solidity, C/C++
- **Frontend:** React, Next.js, Vue.js, responsive Web3 UI/UX
- **Backend:** Node.js, REST APIs, MySQL, WebSocket

Infrastructure & Security

- **DevOps:** Docker, Ubuntu server cluster, CI/CD pipelines, VPN setup
- **Security:** Smart contract auditing (reentrancy, access control), cryptography (Ed25519, SHA-256, AES)
- **Cloud & Infrastructure:** SSL/TLS management, SSH key management, firewall configuration

Blockchain Concepts

- **Consensus:** Proof of Work (PoW), Proof of Stake (PoS), Nominated Proof-of-Stake (NPoS)
 - **Tokenomics:** Vesting schedules, governance, token distribution models
 - **Layer 2 Scaling:** Rollups, zero-knowledge proof architectures
-

PROJECTS & PORTFOLIO

Research Token DApp (Solana Devnet) — *Solo Full-Stack Developer (2023)*

- Developed **AI-integrated decentralized research incentivization platform** using custom SPL token economics
- Designed multi-signature treasury management for enhanced governance security

- Built React/Next.js frontend with seamless Solana wallet integration
- **Impact:** Currently piloting with 5 active researchers; architecture ready for scalable expansion to 100+ users

EduSign Authentication DApp (Multi-Chain Devnet) — *Team Blockchain Developer (2022–2023)*

- Developed **educational credential verification system** compatible with Ethereum and Solana blockchains
- Led smart contract security audits; implemented multi-signature and time-lock validations
- Engineered cross-chain bridges enabling trusted inter-ecosystem transactions
- Established role-based access control ensuring institutional compliance standards

Multi-Chain DApp Toolkit (Personal Portfolio, Ongoing)

- **Ethereum:** CRUD Journal DApp, Token Vesting contracts with cliffs and time-locks
- **Solana:** CRUD Journal DApp, Token Vesting contracts, Blinks integration
- **Polkadot:** Custom Substrate parachain, ink! smart contract development, XCM messaging integration
- **Purpose:** Comprehensive toolkit enabling developers to rapidly deploy cross-chain applications

Cloud Infrastructure & Development Environment

- Architected **production-grade Ubuntu server cluster** with load balancing and failover mechanisms
- Strengthened security using SSH key authentication, fail2ban, and firewall rules
- Automated SSL/TLS certificate management with enforced HTTPS across services
- Managed container orchestration via Docker Swarm to support scalable multi-chain DApp development
- **Achievement:** 60% reduction in local resource usage, enabling efficient collaborative workflows with **99.9% uptime**

PROFESSIONAL EXPERIENCE

Technical Program Manager — *Olympic Games 2024 (2024)*

- Delivered **3 key infrastructure projects at 4x typical industry speed**, on time and budget
- Reduced project delivery blockers by **40%** leveraging agile methodologies and stakeholder coordination
- Directed cross-functional teams achieving **99.9% uptime** and infrastructure reliability during critical events
- Managed high-pressure, time-sensitive deployments for global-scale events

Technical Team Lead — *ESID-Metz/USID-Lille (2022–2025)*

- Managed team of **20+ engineers** and **€4M+ infrastructure budget**, overseeing full project lifecycles
- Mentored junior developers, boosting team productivity by **25%** and reducing project delays
- Instituted structured delivery methodologies, improving timeline adherence and quality standards
- Led technical decision-making for complex system integrations and security implementations

Systems Integration Specialist — *CETID (2015–2018)*

- Designed and deployed **high-availability security systems** with 99.9% uptime for industrial/government sectors
 - Integrated surveillance and intrusion detection solutions tailored to customer requirements
 - Collaborated with cross-functional teams to ensure seamless system integration and compliance
-

EDUCATION & CERTIFICATIONS

Engineering Foundation

General Engineering Diploma — ENSAM (École Nationale Supérieure d'Arts et Métiers)
Top 10 French engineering school — Systems analysis, mathematical modeling

Blockchain Specialization

- **Blockchain Developer Certification** — Alyra (Ethereum/Solidity intensive program)
- **Polkadot Blockchain Academy** — PBA-X Advanced certification
- **Solana Development** — Alyra (Rust/Anchor specialization)

Languages

French (Native) • **English** (Advanced) • **Russian** (Intermediate)

KEY COMPETENCIES

Technical Leadership: 15+ years managing complex technical projects and cross-functional teams

Multi-Chain Expertise: Proven experience across Ethereum, Solana, and Polkadot ecosystems

Security Focus: Smart contract auditing and cryptographic security implementation

Scalable Architecture: Designing systems that grow from prototype to production scale

Problem Solving: Delivering solutions under tight deadlines and high-pressure environments
